The Waterford Floor Plan

Experience the **Waterford** home plan – more than just a house, it’s a sanctuary for your family. With ample space for everyone and every activity, this home is designed for your lifestyle. Entertain with ease in the formal dining room, thanks to the spacious kitchen with a butler’s pantry. For active kids, the mud room and laundry, accessible from the garage, make it simple to put away muddy shoes and sports gear before heading upstairs. Upstairs, discover two additional bedrooms, with one featuring a walk-in-closet, and an enormous game room for family fun. The loft area, full bath, and large storage space make for even more flexibility. The main bedroom, located on the first floor, features a huge walk-in-closet and full bath with his and hers sink. Additionally, there’s an office space at the front of the home that can be used for late-night work sessions or to store hobby materials.
